Small-Molecule Inhibitors for Novel Therapeutics

Message from the Guest Editors

Small-molecule inhibitors represent a promising frontier in the development of novel therapeutics. These compounds are designed to specifically interact with and inhibit the function of target proteins that play critical roles in disease processes. By binding to these proteins, small-molecule inhibitors can disrupt pathological signaling pathways, offering a strategic approach to treating conditions such as cancer, autoimmune disorders, and infectious diseases. Recent advances in molecular biology and high-throughput screening have enabled the identification of previously undruggable targets, expanding the potential applications of these inhibitors. This Special Issue aims to describe recent developments in the research on small molecules, with a focus on enhancing their specificity, potency, and safety profiles toward novel therapeutic targets; small molecules drug delivery. Original research articles and reviews are welcome. We look forward to receiving your contributions. You may choose our [Joint Special Issue](#) in *Pharmaceutics*.

About the Journal

Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*. *Pharmaceuticals* is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us. We hope to handle your contribution to *Pharmaceuticals* soon.

Editor-in-Chief

Prof. Dr. Amélia Pilar Rauter

Departamento de Química e Bioquímica (DQB) e Centro de Química Estrutural (CQE), Institute of Molecular Sciences, Faculdade de Ciências, Universidade de Lisboa, Lisboa, Portugal

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
