Special Issue

Unraveling the Multifaceted Role of Polyphenols in Health Issues

Message from the Guest Editors

Polyphenols have garnered increasing attention for their potential health-promoting properties. Dietary patterns rich in polyphenol-containing foods have been integral to traditional cuisines. These dietary habits have not only shaped cultural identities but have also been associated with lower incidences of chronic diseases. Studies have established associations between higher polyphenol intake and reduced risks of diabetes, cancer, cardiovascular diseases, neurodegenerative disorders. and more. The biological mechanisms underlying these protective effects include antioxidant properties, antiinflammatory activities, modulation of cellular signaling pathways, and interactions with gut microbiota. Besides that, recent studies have shown that the interaction of polyphenols with the food matrix may play a critical role in polyphenol stability and consequent bioactivity. This Special Issue aims to provide a comprehensive overview of the current state of knowledge regarding the therapeutic potential of polyphenols in food, for the management and prevention of diseases, ultimately contributing to a better understanding of their role in promoting global health.

About the Journal

Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*. *Pharmaceuticals* is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us.

We hope to handle your contribution to *Pharmaceuticals* soon.

Editor-in-Chief

Prof. Dr. Amélia Pilar Rauter

Departamento de Química e Bioquímica (DQB) e Centro de Química Estrutural (CQE), Institute of Molecular Sciences, Faculdade de Cièncias, Universidade de Lisboa, Lisboa, Portugal

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
