Advances in Pediatric Drug Formulations

Message from the Guest Editors

The low availability of appropriate pediatric medications remains a focal point for researchers and pharmaceutical manufacturing companies. Although efforts have been made to stimulate the authorization of pediatric medications, the needs of patients are still far away from being fulfilled. Lately, new solid dosage forms have been proposed as alternatives to liquids for different age groups, along with novel devices that ease pediatric drug administration. However, this field requires further research and innovation in terms of the appropriate excipients, product and process development, taste masking, and quality assessment methods. Also, understanding end-user perception and acceptability is needed to guide product formulation and grant treatment adherence. While pediatric drug availability, as well as details on preparation, manipulation, administration practices, and preferences, have long been documented in developed countries, data coming from developing regions are scarce. We extend an invitation to all stakeholders to share their results in the aforementioned matters and bridge the knowledge gaps that currently limit the development of pediatric drugs.

About the Journal

Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*.

Pharmaceuticals is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us.

We hope to handle your contribution to *Pharmaceuticals* soon.

Editor-in-Chief

Prof. Dr. Amélia Pilar Rauter

Departamento de Química e Bioquímica (DQB) e Centro de Química Estrutural (CQE), Institute of Molecular Sciences, Faculdade de Ciências, Universidade de Lisboa, Lisboa, Portugal

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
