Special Issue

Recent Advances in Behavioral Psychopharmacology

Message from the Guest Editor

The global burden of mental disorders continues to grow despite decades of detailed research in the field of neuroscience, using modern methods, including brain imaging techniques. Behavioral research using animal models of mental illnesses or screening tests used for finding potential drugs helps in the search for new forms of therapy. Animal models of mental disorders or at least some disease symptoms, although imperfect, also help to determine the pathomechanism of mental illnesses. Despite significant achievements in behavioral psychopharmacology, new efforts are still needed to cope with the growing problem of the spread of mental illness, and modern techniques appear to be essential in dealing with these challenges. In this Special Issue, we would like to gather experts in behavioral psychopharmacology who focus on discovering new therapeutic agents and strategies and studying the mechanisms of changes in animal behavior in response to environmental fluctuations and pharmacological interventions. Original research articles and stimulating reviews that provide new interpretations of up-to-date results and the extant literature are highly welcome.

About the Journal

Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*. *Pharmaceuticals* is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us.

We hope to handle your contribution to *Pharmaceuticals*.

We hope to handle your contribution to *Pharmaceuticals* soon.

Editor-in-Chief

Prof. Dr. Amélia Pilar Rauter

Departamento de Química e Bioquímica (DQB) e Centro de Química Estrutural (CQE), Institute of Molecular Sciences, Faculdade de Ciências, Universidade de Lisboa, Lisboa, Portugal

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
