

Special Issue

Pain Management: Novel Biomarkers and Therapeutic Targets

Message from the Guest Editors

This Special Issue aims to gather high-quality original research and review articles addressing novel biomarkers of chronic pain, including—but not limited to—molecular, genetic, inflammatory, immune, and neurobiological markers, as well as their clinical relevance and translational potential. Particular attention will be given to studies exploring innovative pain management strategies, including the role of antioxidants and bioactive compounds in modulating pain pathways, inflammation, and oxidative stress. In addition, we welcome contributions on the role of sirtuin during inflammatory pain. Special emphasis will be placed on pharmacological interventions targeting immune activation, specifically NK, B, and T cell signaling, and the therapeutic modulation of neuroimmune axes for the management of chronic pain. *Pharmaceuticals* invites both original research articles and reviews that shed light on the current challenges and emerging opportunities in pain management research.

About the Journal

Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*.

Pharmaceuticals is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us.

We hope to handle your contribution to *Pharmaceuticals* soon.

Editor-in-Chief

Prof. Dr. Amélia Pilar Rauter

Departamento de Química e Bioquímica (DQB) e Centro de Química Estrutural (CQE), Institute of Molecular Sciences, Faculdade de Ciências, Universidade de Lisboa, Lisboa, Portugal

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
