Scientific Evidence-Based Applications of Polyamines in Pharmaceuticals Science

Message from the Guest Editor

The importance of polyamines (spermine and spermidine) in the development and function of living organisms has long been known, and in recent years they have also been implicated in age-related diseases and senescence. In particular, the importance of polyamines supplied by food and the intestinal tract as well as those synthesized within the body's cells is now widely recognized. Arginine and S-adenosylmethionine, essential for polyamine synthesis, are also important substances involved in various functions in vivo. In other words, changes in polyamine metabolism have a significant effect on the physiological activity elicited by these substances in addition to the physiological activity possessed by polyamines. In this Special Issue, we would like to collect research results on the involvement of polyamines in diseases and their diagnosis and potential for the prevention and treatment of these diseases.

About the Journal

Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*.

Pharmaceuticals is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us.

We hope to handle your contribution to *Pharmaceuticals* soon.

Editor-in-Chief

Prof. Dr. Amélia Pilar Rauter

Departamento de Química e Bioquímica (DQB) e Centro de Química Estrutural (CQE), Institute of Molecular Sciences, Faculdade de Ciências, Universidade de Lisboa, Lisboa, Portugal

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
