Research Progress and Drug Intervention Strategies for Oral Health-Related Diseases

Message from the Guest Editors

Oral health-related diseases, particularly dental caries and periodontal diseases, represent some of the most prevalent microbial infections globally.

This Special Issue seeks to comprehensively examine recent advancements in research on oral health-related diseases and innovative drug intervention strategies.

Topics will encompass the molecular mechanisms underlying these conditions and the development and evaluation of novel and personalized therapeutic approaches. Leading-edge research in this field emphasizes advanced biomaterials for drug delivery in oral care, alongside targeted therapies informed by an in-depth understanding of the oral microbiome. This issue will spotlight emerging treatment strategies, including antimicrobial agents, biomaterials, probiotics, and regenerative medicine, aimed at improving prevention and therapeutic outcomes. We invite original research papers, reviews, and case studies that offer new insights into the pathogenesis, diagnosis, or drug-based management of oral health-related diseases. While the primary focus will be on dental caries and periodontitis, studies addressing oral cancer and other oral infections are also welcomed.

About the Journal

Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*.

Pharmaceuticals is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us.

We hope to handle your contribution to *Pharmaceuticals* soon.

Editor-in-Chief

Prof. Dr. Amélia Pilar Rauter

Departamento de Química e Bioquímica (DQB) e Centro de Química Estrutural (CQE), Institute of Molecular Sciences, Faculdade de Ciências, Universidade de Lisboa, Lisboa, Portugal

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
