Do Nanocarriers Enhance Targeted Drug Delivery Mechanisms?

Message from the Guest Editors

Over the last few years, significant progress has been made in drug delivery systems to facilitate the targeted distribution of naturally derived active components, chemically derived therapeutic agents, and chemotherapeutic drugs to treat many degenerative diseases, including cancer and diabetes mellitus. The topics discussed in this special issue include, but are not limited to: Novel nanocarrier designs and their applications;

- Polymer and lipid-based Nanocarriers;
- Monoclonal antibodies in target drug delivery;
- Exosome-Based Drug Delivery;
- Disease-targeted Drug Delivery Mechanism;
- Preclinical and Clinical Applications of Targeted Drug Delivery;
- Biomedical Applications of Nanocarriers;
- Diagnostics uses of Nanocarriers.

We aim to provide a comprehensive platform for researchers to share their expertise and contribute to advancing nanocarrier-assisted drug delivery systems. By shedding light on recent developments, we can collectively shape the future of targeted therapeutics.

About the Journal

Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*. *Pharmaceuticals* is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us. We hope to handle your contribution to *Pharmaceuticals* soon.

Editor-in-Chief

Prof. Dr. Amélia Pilar Rauter

Departamento de Química e Bioquímica (DQB) e Centro de Química Estrutural (CQE), Institute of Molecular Sciences, Faculdade de Ciências, Universidade de Lisboa, Lisboa, Portugal

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
