Advances in Biotechnological Formulations for Skin Disorders: Delivery Strategies and Biocompatibility

Message from the Guest Editors

Skin disorders represent a significant burden on global healthcare systems, affecting millions of individuals and requiring innovative therapeutic strategies. Advances in biotechnological formulations have paved the way for more effective and targeted treatments for various dermatological conditions. These approaches emphasize biocompatibility, sustained release, and improved skin penetration, ensuring greater efficacy and patient adherence. In particular, the integration of cutting-edge delivery systems, natural ingredients, and biopolymers into these therapies has revolutionized the dermatological landscape, opening up new possibilities in addressing inflammatory, infectious, and chronic skin disorders. This Special Issue, “*Advances in Biotechnological Formulations for Skin Disorders: Delivery Strategies and Biocompatibility*,” will provide a platform for disseminating the latest findings in the field of dermatological formulation science. We welcome original research articles and reviews exploring innovative delivery systems and their applications in treating skin disorders, emphasizing formulation and biocompatibility evaluations.

About the Journal

Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*.

Pharmaceuticals is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us.

We hope to handle your contribution to *Pharmaceuticals* soon.

Editor-in-Chief

Prof. Dr. Amélia Pilar Rauter

Departamento de Química e Bioquímica (DQB) e Centro de Química Estrutural (CQE), Institute of Molecular Sciences, Faculdade de Ciências, Universidade de Lisboa, Lisboa, Portugal

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
