Medicinal Chemistry of Metal Complexes: Design, Synthesis and Evaluation

Message from the Guest Editors

Metal-based drugs and metal complexes continue to be of great interest in medicinal chemistry due to their diversity in biological application. Throughout history, metal-based drugs have been used, but the discovery of cisplatin was a breakthrough moment that motivated researchers to design and synthesize more metal complexes for use in biological treatment. Platinum-based drugs, especially cisplatin, are undoubtedly the most commonly used metal complexes in the treatment of cancer, but a large number of complex compounds based on other metals (palladium, gold, ruthenium, silver, tin, rhodium, etc.) are also used as antitumor drugs. This Special Issue focuses on the growing knowledge in coordination chemistry for therapeutic and diagnostic use, such as in cancer, diabetes and CNS disorder therapy, or any other use of metal-based drugs for a biological targets in living organisms. Here, we welcome original research articles and reviews.

About the Journal

Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*. *Pharmaceuticals* is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us. We hope to handle your contribution to *Pharmaceuticals* soon.

Editor-in-Chief

Prof. Dr. Amélia Pilar Rauter

Departamento de Química e Bioquímica (DQB) e Centro de Química Estrutural (CQE), Institute of Molecular Sciences, Faculdade de Ciências, Universidade de Lisboa, Lisboa, Portugal

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
