Use of Anesthetic Agents: Management and New Strategy

Message from the Guest Editors

The use of new anesthetic agents with the intention of promoting the recovery of patients in the postoperative process has been the subject of multiple studies. Procedures with multimodal anesthesia are addressed in the chain of nociception and in different situations of hyperalgesia, have been the subject of different research studies and meta-analyses with the intention of delving deep into the knowledge of their benefits. Our knowledge of the organoprotective role of anesthetic drug administration has been advancing in recent years, , the association of oncological recurrence with dissemination during the oncological process, thanks to the surgical procedure and possible hematogenous dissemination has been the subject of continuous work in which attention is drawn to the different activity of halogenated and intravenous drugs depending on the tumor type. Therefore, we invite contributions to this Special Issue as an opportunity to evaluate anesthetic drugs as therapeutic tools.

About the Journal

Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*.

Pharmaceuticals is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us.

We hope to handle your contribution to *Pharmaceuticals* soon.

Editor-in-Chief

Prof. Dr. Amélia Pilar Rauter

Departamento de Química e Bioquímica (DQB) e Centro de Química Estrutural (CQE), Institute of Molecular Sciences, Faculdade de Ciências, Universidade de Lisboa, Lisboa, Portugal

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
