Advances in Antiparasitic Drug Research: 2nd Edition

Message from the Guest Editors

The field of antiparasitic drug research has witnessed substantial advancements in recent times. People have successfully developed new compounds with higher specificity and efficacy, significantly reducing side effects and enhancing patient compliance.

Breakthroughs in our understanding of parasite genetics and biology have facilitated the identification of novel drug targets, leading to the creation of drugs that effectively combat resistant strains. Despite these achievements, challenges persist. The complex life cycles of many parasites and their ability to evade host immune responses pose significant hurdles.

Additionally, the limited resources and infrastructure in endemic regions create barriers to the effective distribution and use of these drugs. Continued research is crucial to address these challenges, ensuring that antiparasitic drugs remain effective and accessible in the fight against parasitic diseases. We invite scholars to contribute their groundbreaking research to this vibrant field, fostering collaborative efforts to overcome existing challenges and propel antiparasitic drug research to unprecedented heights.

About the Journal

Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*.

Pharmaceuticals is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us.

We hope to handle your contribution to *Pharmaceuticals* soon.

Editor-in-Chief

Prof. Dr. Amélia Pilar Rauter

Departamento de Química e Bioquímica (DQB) e Centro de Química Estrutural (CQE), Institute of Molecular Sciences, Faculdade de Ciências, Universidade de Lisboa, Lisboa, Portugal

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
