

Special Issue

Recent Advances in the Discovery and Development of Drugs for Civilization Diseases, 2nd Edition

Message from the Guest Editors

Civilization diseases, otherwise known as lifestyle diseases, social diseases, or diseases of the 21st century, include non-communicable diseases that have spread around the world due to the development of civilization. In order to be able to fight civilization diseases more effectively, proper prevention is needed, with new treatments and drugs. In this Special Issue, we invite potential authors to submit manuscripts in the form of research articles, reviews, or communications that contribute to every aspect of medicinal chemistry, the discovery of new drugs for broadly understood civilization diseases, their synthesis, mechanisms of action, biological activity, and advances in drug dosage forms. This Special Issue will welcome original, high-quality scientific articles, reviews, and communications in the field of computational methods for drug design, i.e., in silico research, as well as synthetic and biochemical approaches on this topic.

About the Journal

Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*.

Pharmaceuticals is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us.

We hope to handle your contribution to *Pharmaceuticals* soon.

Editor-in-Chief

Prof. Dr. Amélia Pilar Rauter

Departamento de Química e Bioquímica (DQB) e Centro de Química Estrutural (CQE), Institute of Molecular Sciences, Faculdade de Ciências, Universidade de Lisboa, Lisboa, Portugal

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
