

Special Issue

Microglia and Astrocytes as Drug Targets

Message from the Guest Editors

Neuroinflammation is driven by the activation of microglia and astrocytes (gliosis) and escalates with demyelination or neurodegeneration in many neurodegenerative or demyelinating diseases, such as Alzheimer's disease (AD), Parkinson's disease (PD), amyotrophic lateral sclerosis (ALS) and multiple sclerosis (MS). In normal physiological condition, glial cells maintain homeostasis in and provide support to the central nervous system (CNS) and participate in the regulation of neuronal and synaptic functions. Upon activation, microglia and astrocytes can be either beneficial or detrimental based on the level or stages of activation. By enhancing beneficial and/or reducing detrimental aspects of glial activation, amelioration of neuroinflammation, demyelination and neurodegeneration can be achieved, although no such therapeutics exists based on our knowledge. Therefore, there is a crucial need to find new therapeutic products that can modulate glial activation to treat neuroinflammatory and neurodegenerative diseases in the future. This is the focus of this Special Issue, which will collect articles investigating microglia and astrocytes-specific drug candidates.

About the Journal

Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*. *Pharmaceuticals* is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us. We hope to handle your contribution to *Pharmaceuticals* soon.

Editor-in-Chief

Prof. Dr. Amélia Pilar Rauter

Departamento de Química e Bioquímica (DQB) e Centro de Química Estrutural (CQE), Institute of Molecular Sciences, Faculdade de Ciências, Universidade de Lisboa, Lisboa, Portugal

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
