Exploring Natural Metabolites to Identify Novel Potential Therapeutic Agents

Message from the Guest Editor

Based on their chemical nature, these metabolites can be classified into different categories: terpenoids and steroids, alkaloids, non-ribosomal polypeptides, fatty-acid-derived substances and polyketides, and shikimate-derived compounds. All these compounds have different bioactivities, and have always been studied for their pharmaceutical efficacy on human health, and have constantly played a pivotal role in the design and development of powerful therapeutic agents. In summary, natural metabolites play a significant role in the design and development of novel powerful therapeutic agents because of their functions and unique structures, because of which they can be considered the cornerstone of drug discovery. This Special Issue, "Exploring natural metabolites to identify novel potential therapeutic agents", aims to collect papers concerning the identification, discovery, analysis and/or activity of new biologically active metabolites from microorganisms and plants; in addition, a particular focus on new achievements in the field will be appreciated. Reviews and future perspectives are also welcome.

About the Journal

Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*.

Pharmaceuticals is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us.

We hope to handle your contribution to *Pharmaceuticals* soon.

Editor-in-Chief

Prof. Dr. Amélia Pilar Rauter

Departamento de Química e Bioquímica (DQB) e Centro de Química Estrutural (CQE), Institute of Molecular Sciences, Faculdade de Ciências, Universidade de Lisboa, Lisboa, Portugal

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
