

Special Issue

20th Anniversary of *Pharmaceuticals*—Advances in Pathophysiology, Pharmacology and Neuroprotection in Glaucoma

Message from the Guest Editor

It is our great delight and honor to celebrate the 20th Anniversary of *Pharmaceuticals* with a Special Issue on glaucoma, and to invite researchers to contribute a manuscript of original research, review, or short communication. The articles from this Special Issue will be compiled into a dedicated book. As you are aware, the many forms of glaucoma afflict millions of people worldwide. There is still a critical need to better understand the genetics, pathophysiology, and clinical ramifications connected with this heterogeneous optic neuropathy. As leaders in the glaucoma field, I cordially invite you to contribute an original or a review article covering the pathogenesis and/or pharmacology of current treatment modalities for ocular hypertension and glaucoma in an area of your expertise. This can also include neuroprotection for glaucomatous optic neuropathy, animal models, and related topics such as diagnosis, devices, AI, and, of course, the pharmacology of the receptors/enzymes/ion-channels implicated in the disease process or treatment(s).

About the Journal

Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*.

Pharmaceuticals is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us.

We hope to handle your contribution to *Pharmaceuticals* soon.

Editor-in-Chief

Prof. Dr. Amélia Pilar Rauter
