Exploring Natural Products as Modulators of Oxidative Stress in Health and Disease

Message from the Guest Editors

In recent years, natural products have become increasingly popular due to the wide range of biological activities ascribed to them. In particular, their ability to modulate oxidative stress has been proposed as a potential strategy via which to promote human health. The aim of this Special Issue is to collect studies focused on unveiling the dual antioxidant or pro-oxidant role of natural products and the possible pharmaceutical applications and safety. The scope of this Special Issue includes, but is not limited to, the following:

- discovering novel sources of antioxidants;
- investigating the role of antioxidant agents in countering various pro-oxidant stressors and their effectiveness in experimental models of inflammatory and oxidative-related diseases;
- unravelling the mechanism underlying the potential adverse reactions associated with antioxidant agents;
- exploring the effects on cell signaling pathways and molecular targets;
- carrying out pharmacokinetic and digestion studies to better understand the absorption and metabolism of antioxidants;
- clarifying the safety and efficacy of antioxidants in clinical trials.

About the Journal

Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*. *Pharmaceuticals* is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us. We hope to handle your contribution to *Pharmaceuticals* soon.

Editor-in-Chief

Prof. Dr. Amélia Pilar Rauter

Departamento de Química e Bioquímica (DQB) e Centro de Química Estrutural (CQE), Institute of Molecular Sciences, Faculdade de Ciências, Universidade de Lisboa, Lisboa, Portugal

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
