Therapeutic Potential of Natural Products in Internal Diseases

Message from the Guest Editors

In the last decades tremendous progress has been made in the discovery of new drugs for the treatment of internal diseases, changing the prognostics and course of these diseases. There are many instances of inappropriate employment of conventional drugs in the treatment of symptoms/disorders for which those drugs are not indicated, such as antibiotics for viral diseases, coronary heart disease medication for unspecific (including psychosomatic) chest pain, blood pressure-lowering medication for emotion-related fluctuations in blood pressure, etc., and many honest practitioners acknowledge that they should use something else, but lack the trust in or knowledge of alternative therapies. A large segment of the population prefers alternative treatments, one of the most popular being herbal treatments. Individuals relying on alternative therapies are more amenable to health-promoting lifestyle changes. Let us, those that understand the considerable and insufficiently tapped potential of natural products, provide high-quality studies and reviews promoting the use of these products.

About the Journal

Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*.

Pharmaceuticals is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us.

We hope to handle your contribution to *Pharmaceuticals* soon.

Editor-in-Chief

Prof. Dr. Amélia Pilar Rauter

Departamento de Química e Bioquímica (DQB) e Centro de Química Estrutural (CQE), Institute of Molecular Sciences, Faculdade de Ciências, Universidade de Lisboa, Lisboa, Portugal

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
