Special Issue

Potential Therapeutic Targets for the Treatment of Pathological Pain

Message from the Guest Editor

As one of the most common reasons people seek medical care, pain is an issue of extreme relevance. Pathological pain, such as chronic inflammatory, neuropathic, and dysfunctional or nociplastic pain impairs the life quality of patients, leading to the development of anxiety, depression, labour capacity loss, and even distancing from family members and society. Often, the analgesic drugs used clinically present limited efficacy and cause various adverse effects, including analgesic tolerance, dependency, and abuse possibility, limiting their use. Thus, identifying potential therapeutic targets for treating pathological pain is highly relevant for developing more effective and safe analgesic drugs for adequate pain relief. This Special Issue is intended to investigate potential therapeutic targets for developing new analgesics, the signalling pathways involved in these processes, and the analgesic effect of synthetic drugs or natural products in pathological pain models. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*. *Pharmaceuticals* is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us.

We hope to handle your contribution to *Pharmaceuticals* soon.

Editor-in-Chief

Prof. Dr. Amélia Pilar Rauter

Departamento de Química e Bioquímica (DQB) e Centro de Química Estrutural (CQE), Institute of Molecular Sciences, Faculdade de Cièncias, Universidade de Lisboa, Lisboa, Portugal

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
