Multitargeted Compounds: A Promising Approach in Medicinal Chemistry

Message from the Guest Editor

In recent years, the development of novel therapeutic agents with the ability to interact with multiple targets simultaneously has drawn significant attention in the field of medicinal chemistry. These multitargeted compounds offer a new paradigm for drug discovery and hold immense potential for addressing complex diseases with intricate molecular mechanisms. This proposed Special Issue aims to explore the design, synthesis, and application of multitargeted compounds as a promising strategy in the field of medicinal chemistry.

About the Journal

Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*. *Pharmaceuticals* is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us. We hope to handle your contribution to *Pharmaceuticals* soon.
