Special Issue

Antiradical, Chemopreventive and Antimicrobial Analysis of Bioactive Substances

Message from the Guest Editor

Currently, a wide range of various plant constituents with antioxidant properties are used in the prevention and treatment of various age-related inflammatory diseases, characterised by progressive neurodegeneration (dementia), oxidative damage to blood vessels (atherosclerosis), metabolic disorders (metabolic syndrome, diabetes, obesity), and the promotion of some neoplastic processes. Furthermore, a very big problem and challenge for the medical community is also the progressive resistance of pathogenic microorganisms to conventional antimicrobial drugs.

I invite you to contribute your latest research findings or updated reviews to this Special Issue focused on various aspects of the isolation of new constituents of natural origin, as well as obtaining herbal preparations (including plant extracts), and performing chemical and/or biomedical studies in terms of their antioxidant, chemopreventive and antimicrobial properties.

About the Journal

Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*. *Pharmaceuticals* is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us.

We hope to handle your contribution to *Pharmaceuticals*.

We hope to handle your contribution to *Pharmaceuticals* soon.

Editor-in-Chief

Prof. Dr. Amélia Pilar Rauter

Departamento de Química e Bioquímica (DQB) e Centro de Química Estrutural (CQE), Institute of Molecular Sciences, Faculdade de Ciências, Universidade de Lisboa, Lisboa, Portugal

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
