Bioactive Substances and Skin Health: The Role of Pharmacy and Nutrition—Properties and Technology

Message from the Guest Editors

Bioactive substances can have therapeutic potential, including the prevention and/or treatment of a disease. The diversity of the chemical structures of bioactive compounds influences their bioavailability and biologic properties. In fact, it has been shown that bioactive substances can provide benefits to the skin, such as increased hydration, reduction in wrinkles, and improvements in elasticity, density, and skin texture, along with antioxidant and anti-inflammatory actions induced via UV radiation, reduction in the signs of dermatitis, and prevention against some forms of skin cancer. Pharmaceutical and nutritional sciences can join forces to provide a variety of bioactive substances that play an important role in skin health. This Special Issue aimed to present the advances and studies available on how bioactive substances can be a useful option for skin health.

About the Journal

Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*. *Pharmaceuticals* is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us. We hope to handle your contribution to *Pharmaceuticals* soon.

Editor-in-Chief

Prof. Dr. Amélia Pilar Rauter

Departamento de Química e Bioquímica (DQB) e Centro de Química Estrutural (CQE), Institute of Molecular Sciences, Faculdade de Ciências, Universidade de Lisboa, Lisboa, Portugal

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
