

Special Issue

Pharmaceutical Formulation Characterization Design

Message from the Guest Editors

This Special Issue is dedicated to reporting the latest scientific results in the field of "Formulation Characterization Design". It is necessary to find out whether there is any change in the active ingredient during pharmaceutical technological processes and whether this could influence the development of the effect. It is necessary to understand the relationships between different structural properties, the dissolution profile, and effect development in order to be able to design medicines more efficiently based on new knowledge. It is possible to determine the design space, which provides accurate information provides information about the Critical Process Parameter (CPP) values, within which the product with the quality target product profile (QTPP) will be suitable. This Special Issue primarily publishes results related to the above-mentioned topic or some part of it, mainly in the field of solid dosage form formulation or intermediate products that can be used in them.

About the Journal

Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*. *Pharmaceuticals* is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us. We hope to handle your contribution to *Pharmaceuticals* soon.

Editor-in-Chief

Prof. Dr. Amélia Pilar Rauter

Departamento de Química e Bioquímica (DQB) e Centro de Química Estrutural (CQE), Institute of Molecular Sciences, Faculdade de Ciências, Universidade de Lisboa, Lisboa, Portugal

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
