Recent Advances in Ocular Pharmacology

Message from the Guest Editors

Ophthalmic drug discovery and development is a dynamic field of research, which draws increasing attention, as novel medications and delivery techniques demonstrate promising results. New therapeutic agents, including pharmaceutical compounds and gene therapy products, overcome the anatomic and physiologic barriers, achieving increasingly satisfactory treatment outcomes. It is vital that eye health professionals are kept up to date with the most recent achievements in this emerging field, thus being able to implement state-of-the-art treatments in their practice. The aim of this Special Issue is to present current research, clinical trials, and reviews concerning ocular drugs.

About the Journal

Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*. *Pharmaceuticals* is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us. We hope to handle your contribution to *Pharmaceuticals* soon.
