Pharmacological Targets of Bone Homeostasis: Osteoclasts and Osteoblasts

Message from the Guest Editors

Bone is a highly metabolic organ that is intricately involved in lifelong remodeling to maintain optimal bone architecture and bidirectional signaling transduction between osteoclastic bone resorption and osteoblastic bone formation. In addition to mineral dysregulation, osteoblasts and osteoclasts communicate to influence cellular functions, behavior, proliferation, survival and differentiation through both systemic hormones and local regulation of cytokines/growth factors. Emerging scientific studies have elucidated the pathogenesis peculiarities of bone homeostasis, providing evidence-supported diagnosis and therapeutic recommendations. This Special Issue aims to collect high-quality articles furthering the understanding of molecular mechanisms for multidisciplinary skeletal disorders and effective pharmaceutical targets to provide clinicians with novel evidence-based medicine.

About the Journal

Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*. *Pharmaceuticals* is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us. We hope to handle your contribution to *Pharmaceuticals* soon.

Editor-in-Chief

Prof. Dr. Amélia Pilar Rauter

Departamento de Química e Bioquímica (DQB) e Centro de Química Estrutural (CQE), Institute of Molecular Sciences, Faculdade de Ciências, Universidade de Lisboa, Lisboa, Portugal

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
