Special Issue

C-H Functionalization Chemistry: Applications in Drug Synthesis

Message from the Guest Editor

The synthetic route has been considered as the ratelimiting factor in the discovery of novel drugs. A suitable synthetic route usually needs to be highly efficient, economical, green, etc. C-H functionalization chemistry, as the newest synthesis technology, has developed rapidly in the past decade. Currently, the area of C-H functionalization chemistry not only focuses on the development of novel C-H activation reactions but has also been increasingly applied in the synthesis of drugs or construction of biological molecules with the desired pharmacological properties. The current Special Issue will provide a platform to communicate recent, promising, and novel research trends using C-H functionalization chemistry applied in drug synthesis, natural product total synthesis, modification of biological macromolecules, as well as synthesis of fluorescent probe molecules.

About the Journal

Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*. *Pharmaceuticals* is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us.

We hope to handle your contribution to *Pharmaceuticals* soon.

Editor-in-Chief

Prof. Dr. Amélia Pilar Rauter

Departamento de Química e Bioquímica (DQB) e Centro de Química Estrutural (CQE), Institute of Molecular Sciences, Faculdade de Cièncias, Universidade de Lisboa, Lisboa, Portugal

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
