

Special Issue

Diagnostics and Pharmacology of Male Reproduction

Message from the Guest Editors

Male infertility is a growing problem, especially among developed countries. In the face of the growing problem of male infertility, which is reflected in the systematically deteriorating quantitative and qualitative parameters of human sperm in recent years, timely diagnosis and treatment have become particularly important. The aim of the Special Issue "Diagnostics and Pharmacology of Male Reproduction" is a presentation of multidisciplinary manuscripts on a wide range of molecular, genetic, and biochemical aspects of diagnostic and pharmacological male infertility management. Studies focused on two aspects of male infertility—the identification of biomarkers for early and accurate diagnosis as well as factors and mechanisms with the potential to be used as targets for effective pharmacotherapy, including new drugs, methods and procedures of pharmacotherapy—are especially welcome. Updated reviews and research articles with comprehensive theoretical and experimental details are invited. Short communications are also accepted; there is no restriction on the length of the manuscript.

About the Journal

Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*. *Pharmaceuticals* is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us. We hope to handle your contribution to *Pharmaceuticals* soon.

Editor-in-Chief

Prof. Dr. Amélia Pilar Rauter

Departamento de Química e Bioquímica (DQB) e Centro de Química Estrutural (CQE), Institute of Molecular Sciences, Faculdade de Ciências, Universidade de Lisboa, Lisboa, Portugal

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
