

## Special Issue

# Drug Treatments for Autism

### Message from the Guest Editor

Autism Spectrum Disorder (ASD) is a neurodevelopmental disorder with a prevalence of more than 1%, rising to 41% in extremely premature babies. Autism prevalence is approximately four times higher in males than females. Both environmental and genetic factors have a role in the incidence of autism. Apart from the etiological aspects of autism, treatment for the disorder is not optimal. There are several groups of autism symptoms (e.g., emotional and behavioral) which need to be treated separately, and thus there are several therapeutic approaches, such as pharmacological, educational and psychological. None of these methods are completely successful in the improvement of symptoms, especially on their own. Indeed, autism is a heterogeneous disorder which affects each person differently, and therefore people with autism have different treatment needs. In this context, this Special Issue aims to collect information about different pharmacotherapeutic approaches for autism by considering both clinical and preclinical studies to improve our knowledge on the possible pharmacotherapies currently available and identify future therapeutic targets for autism.

## About the Journal

### Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*. *Pharmaceuticals* is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us. We hope to handle your contribution to *Pharmaceuticals* soon.

---

### Editor-in-Chief

Prof. Dr. Amélia Pilar Rauter

Departamento de Química e Bioquímica (DQB) e Centro de Química Estrutural (CQE), Institute of Molecular Sciences, Faculdade de Ciências, Universidade de Lisboa, Lisboa, Portugal

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
