

## Special Issue

# Nitrogen Containing Scaffolds in Medicinal Chemistry 2023

### Message from the Guest Editors

Most of the organic compounds used as therapeutics, as well as intermediates utilized for their synthesis, contain heterocyclic motifs. Nitrogen-containing scaffolds are among the most significant structural components of therapeutic agents. Furthermore, there are a plethora of natural products. Over the past decades, much attention has been devoted to the development of and pharmacological studies into heteroaromatic organic compounds that are currently considered privileged scaffolds for different therapeutic agents. This Special Issue will publish research papers with topics including, but not limited to, the preparation of aromatic and non-aromatic nitrogen-containing heterocycles endowed with any biological action. We also welcome contributions that highlight the importance of the nitrogen-based scaffolds that are widely found in agrochemicals, dyes, cosmetics and functional materials. The aim of the present Special Issue is primarily to present an overview primarily of the state of the art of synthetic methods and recent advances in the synthesis of nitrogen-based heterocycles.

## About the Journal

### Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*. *Pharmaceuticals* is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us. We hope to handle your contribution to *Pharmaceuticals* soon.

---

### Editor-in-Chief

Prof. Dr. Amélia Pilar Rauter

Departamento de Química e Bioquímica (DQB) e Centro de Química Estrutural (CQE), Institute of Molecular Sciences, Faculdade de Ciências, Universidade de Lisboa, Lisboa, Portugal

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
