Pharmaceutical Excipients in Formulation Design and Drug Delivery

Message from the Guest Editor

Excipients are the therapeutically inactive components of medication formulations that are essential to ensure the stability, solubility, and bioavailability of the dosage form. Excipients were long considered to be safe and inert, however, there has been increasing concerns around the safety of excipients, particularly in highly susceptible patient populations. The aim of compiling this Special Issue of *Pharmaceuticals* on the topic of “Pharmaceutical Excipients in Formulation Design and Drug Delivery” is to draw together experts with knowledge in the field of Excipients across this widely diverse area, including chemists, pharmaceutical and regulatory scientists, and clinicians, who are engaged in contemporary pure and applied research to solve the challenges of delivering quality drug dosage forms, which are safe to all populations. Submissions (original papers and reviews) that contribute to understanding and applications of relevance for Pharmaceutical Excipients in Formulation Design and Drug Delivery are welcomed for this Special Issue.

About the Journal

Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*.

Pharmaceuticals is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us.

We hope to handle your contribution to *Pharmaceuticals* soon.

Editor-in-Chief

Prof. Dr. Amélia Pilar Rauter

Departamento de Química e Bioquímica (DQB) e Centro de Química Estrutural (CQE), Institute of Molecular Sciences, Faculdade de Ciências, Universidade de Lisboa, Lisboa, Portugal

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
