New Psychoactive Natural Products

Message from the Guest Editors

The potential therapeutic application of natural matrices is extremely dependent on the chemical class(es) of their compounds. The research of psychoactive natural products, both alone and in mixtures of different species, has expanded in recent years. Understanding the mechanisms underlying these effects in brain function could potentially provide insights regarding the application of novel therapeutic approaches to various brain diseases and disorders.

Authors are welcome to submit their research addressing natural products with psychoactive properties. Some suggested topics are as follows:

- Identifying new clinical applications of psychoactive natural products
- Probing the neural mechanisms of action underlying psychological manifestations, at functional and molecular levels
- Drug delivery strategies
- Potentially addictive properties of psychoactive drugs
- Applications in pain research.

About the Journal

Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*. *Pharmaceuticals* is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us. We hope to handle your contribution to *Pharmaceuticals* soon.

Editor-in-Chief
