# **Special Issue**

# Heterocyclic Chemistry for Cancer and CNS Diseases

### Message from the Guest Editor

Heterocycles are prevalent in nature and they have the ability to engage in a wide variety of intermolecular interactions and in biochemical processes; consequently, they plays an important role in anticancer drug design (65% of the anti-cancer drugs that have received approval from the Food and Drug Administration (FDA) between 2010 and 2015 contain nitrogen-based heterocycles). New heterocyclic compounds have also been developed in the last ten years for the central nervous system (CNS), particularly for the treatment of Alzheimer's disease (AD). Molecular design for the development of cholinesterase (ChEIs) inhibitors, monoaminoxydases (MAOs) inhibitors, NMDA receptor antagonism, etc., involved the exploration of many natural products (their modified derivatives) and also synthetic heterocyclic compounds.

## **About the Journal**

## Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*. *Pharmaceuticals* is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us.

We hope to handle your contribution to *Pharmaceuticals* soon.

### Editor-in-Chief

### Prof. Dr. Amélia Pilar Rauter

Departamento de Química e Bioquímica (DQB) e Centro de Química Estrutural (CQE), Institute of Molecular Sciences, Faculdade de Cièncias, Universidade de Lisboa, Lisboa, Portugal

### **Author Benefits**

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
