# Pharmacology and Medicinal Value of Flowering Plant in the Treatment of Non-communicable Diseases

## Message from the Guest Editors

Recent estimates shows that non-communicable diseases (NCDs) are responsible for the majority of deaths worldwide. Historically, plants are important therapeutic and preventive agents. In addition, it represents one of the natural arsenal of medicines that can be effectively harnessed to treat, prevent and manage inflammation, oxidative stress and tumor developments. There is growing volume of scientific evidence that plants or products derived from them might have a role to play in suppressing acute and chronic inflammations, effect sometimes attributed to their in vivo antioxidants properties. Another interesting fact about flowering plants is the use of some of species as supplements or "nutraceuticals" with promising preclinical and epidemiological studies pointing to their efficact and safety. This Special Issue is dedicated to highlighting important medicinal flowering plants with substantial pre-clinical and clinical evidence for their efficacy in the prevention or treatments of inflammation and cancer/antitumor activities. In this context, we invite investigators to submit both original research and review articles that explore these aspects.

## **About the Journal**

## Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*. *Pharmaceuticals* is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us.

We hope to handle your contribution to *Pharmaceuticals*.

We hope to handle your contribution to *Pharmaceuticals* soon.

### Editor-in-Chief

### Prof. Dr. Amélia Pilar Rauter

Departamento de Química e Bioquímica (DQB) e Centro de Química Estrutural (CQE), Institute of Molecular Sciences, Faculdade de Ciências, Universidade de Lisboa, Lisboa, Portugal

## **Author Benefits**

## Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

## **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
