# Use of Encapsulating Polymers of Active Compounds in the Pharmaceutical Industry

### Message from the Guest Editors

The advancement of the use of polymers for drug delivery is constantly growing; however, few reach the market. Currently, there are natural and synthetic polymers that are used to carry active molecules, although vesicles formed by proteins and lipids have also been considered polymeric carriers. Therefore, recognizing viable trends for the industry offers a new perspective in designing innovative viable solutions for vehicles of active molecules.

## About the Journal

### Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*.

*Pharmaceuticals* is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us.

We hope to handle your contribution to *Pharmaceuticals* soon.
