

## Special Issue

# Telomere Length and Cardiovascular Disease: A Precursor Marker and Therapeutic Target

### Message from the Guest Editors

Over the last two decades, the scientific society has been investigating the role of biomarkers in the early detection of atherosclerotic disease. Currently, the investigation of telomeres as a potential tool for the early detection of atherosclerotic disease seems to be a promising method. Telomere length (TL) has been associated with several human disorders and diseases while its attrition rate varies significantly in the population. Therapy targeting telomere length also changed the way that medicine uses the therapeutic arsenal in several conditions, including cardiovascular diseases. In this Special Issue, we aim to investigating how TL shortening serves as a precursor marker and a potential therapeutic target in cardiovascular disorders, and explore the current and future treatment options based on TL, new advances in pharmacological uses and the relationship between telomere research/biomarker research and drugs. We invite researchers to contribute their expertise and insights in uncovering the multifaceted aspects of TL in cardiovascular health for this comprehensive exploration.

## About the Journal

### Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*. *Pharmaceuticals* is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us. We hope to handle your contribution to *Pharmaceuticals* soon.

---

### Editor-in-Chief

Prof. Dr. Amélia Pilar Rauter

Departamento de Química e Bioquímica (DQB) e Centro de Química Estrutural (CQE), Institute of Molecular Sciences, Faculdade de Ciências, Universidade de Lisboa, Lisboa, Portugal

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
