# Natural Products and Their Modifications as Agents Used in the Fight against Pathogens

## Message from the Guest Editor

The problem of the resistance of bacterial strains to commercially available antibiotics keeps clinicians around the world awake at night. Therefore, the search for new compounds of natural origin is crucial in solving this problem. It is crucial that these products simultaneously protect the intestinal microbiota, which plays a huge role in maintaining the health of the entire Therefore, articles that compare the biological activity of pathogenic strains and/or intestinal microbiota in the presence of natural compounds/compounds used in medicine in various chemical modifications will be of interest here. Manuscripts examining the effect of plant extracts themselves and pure compounds or their combinations dominant in the plant will also be of interest. Extracts and their main components obtained as a result of chemical modifications and biotransformations seem to be the future in the fight against infections caused by multidrug-resistant strains.

## **About the Journal**

## Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*. *Pharmaceuticals* is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us.

We hope to handle your contribution to *Pharmaceuticals* soon.

#### Editor-in-Chief

#### Prof. Dr. Amélia Pilar Rauter

Departamento de Química e Bioquímica (DQB) e Centro de Química Estrutural (CQE), Institute of Molecular Sciences, Faculdade de Cièncias, Universidade de Lisboa, Lisboa, Portugal

### **Author Benefits**

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
