Progress in the Development and Medical Applications of PET/SPECT Radiotracers and Theranostics

Message from the Guest Editor

This proposed Special Issue aims to explore the future directions in the development and medical applications of PET (Positron Emission Tomography) and SPECT (Single-Photon Emission Computed Tomography) radiotracers, focusing on theranostics. As imaging technologies and radiotracer chemistry continue to evolve, this Special Issue will provide an in-depth analysis of emerging trends, technological advancements, and their potential impact on clinical practice. The future of PET/SPECT radiotracers and theranostics holds immense promise for advancing medical imaging and treatment. This Special Issue will provide a comprehensive overview of upcoming trends and their potential to revolutionize patient care, offering valuable knowledge to professionals and researchers.

About the Journal

Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*. *Pharmaceuticals* is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us. We hope to handle your contribution to *Pharmaceuticals* soon.
