Polyphenols in the Treatment for Neuroinflammation-Induced Neurodegenerative Disease

Message from the Guest Editors

One of the more promising approaches considers the inhibition of amyloid formation by small-molecule inhibitors; however, multiple failures of clinical therapeutic approaches indicate that the current strategies must be modulated and emphasize the importance of targeting pre-symptomatic signs as oxidative stress and inflammation. Both oxidative stress and neuroinflammation preside over the symptomology of neurodegenerative disorders, and each promotes neurotoxic environments associated with neurodegeneration. In this scenario, polyphenols represent a promising starting point for new preventive and therapeutic approaches, since they target effectively and simultaneously inflammatory and oxidative pathways, and amyloid aggregation. These molecules have worldwide availability, low cost, and low toxicity. Improved knowledge of these topics is mandatory to promote the use of natural polyphenols well beyond their known antioxidant, antidiabetic, and antilipidemic effects. Increased information in this sense could be exploited to enrich, from a commercial and nutraceutical point of view, the alimentary and healthy value of natural compounds.

About the Journal

Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*. *Pharmaceuticals* is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us. We hope to handle your contribution to *Pharmaceuticals* soon.

Editor-in-Chief

Prof. Dr. Amélia Pilar Rauter

Departamento de Química e Bioquímica (DQB) e Centro de Química Estrutural (CQE), Institute of Molecular Sciences, Faculdade de Ciências, Universidade de Lisboa, Lisboa, Portugal

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
