Applications of Micro-Nanosystems in Retinoids Delivery

Message from the Guest Editor

Dear Colleagues Retinoids have proven performances in providing beneficial effects in a wide range of applications in the treatment of skin diseases, such as psoriasis, acne, actinic keratosis, and photoaging. Moreover, they induce differentiation of cancer cells and redirect them toward their normal phenotype, representing a valid tool for counteracting malignant lesions. Retinoids, in particular retinoic acid, have already marked an important advance in the treatment of acute promyelocytic leukemia, while other studies have proven their efficacy against a number of types of cancer cell lines (melanoma, neuroblastoma, prostate, and non-small cell lung carcinoma). Unfortunately, retinoids alone are unstable, as they are sensitive to oxygen, heat, and light. Furthermore, they are poorly soluble in water and often irritant. This Special Issue intends to provide examples of retinoid-loaded micro-nanodelivery systems as their utilization may decrease unwanted side effects, enhance drug solubility, provide sustained release, and exert drug protection against environmental agents.

About the Journal

Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*.

Pharmaceuticals is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us.

We hope to handle your contribution to *Pharmaceuticals* soon.

Editor-in-Chief

Prof. Dr. Amélia Pilar Rauter

Departamento de Química e Bioquímica (DQB) e Centro de Química Estrutural (CQE), Institute of Molecular Sciences, Faculdade de Ciências, Universidade de Lisboa, Lisboa, Portugal

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
