Precision Medicine in Oncology: Controlling the Pharmacokinetics Variability

Message from the Guest Editor

Several groundbreaking pharmaceutical innovations, such as the rise of oral targeted therapies or, more recently, immune checkpoint inhibitors, have changed the way cancer patients are treated today. In parallel, precision medicine, also known as biomarker-based medicine or 4P Medicine, has been proposed as a novel, global strategy aiming at personalizing treatments. To date, most efforts in Precision Medicine have focused on deciphering genomics and molecular alterations at the tumor level as a means to select the most appropriate treatment. [......]
