

Special Issue

Click Chemistry-Aided Drug Discovery

Message from the Guest Editor

Click chemistry has had an enormous impact on drug discovery, as it has provided chemists with an arsenal of selective, high-yielding, and modular reactions to rapidly assemble and optimize bioactive molecules. This Special Issue aims to highlight advances in the application of click chemistry at all steps of the drug discovery process—from the design and synthesis of diverse compound libraries to targeted delivery systems and chemical probes for biological evaluation.

Contributions to the Special Issue will showcase examples of how click chemistry can improve lead identification and structure–activity relationship (SAR) studies, facilitate the isolation and modification of natural products, and provide new therapeutic modalities. By presenting original research, reviews, and short communications, this Special Issue is expected to provide a snapshot of how click chemistry is expanding the medicinal chemistry toolbox, presenting new solutions to problems that have challenged drug development for years.

About the Journal

Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*.

Pharmaceuticals is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us.

We hope to handle your contribution to *Pharmaceuticals* soon.

Editor-in-Chief

Prof. Dr. Amélia Pilar Rauter

Departamento de Química e Bioquímica (DQB) e Centro de Química Estrutural (CQE), Institute of Molecular Sciences, Faculdade de Ciências, Universidade de Lisboa, Lisboa, Portugal

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
