Pharmaceutical and Cellular Strategies to Treat GVHD

Message from the Guest Editors

Graft-versus-host disease (GVHD) is a systemic disorder characterized by inflammation in different organs, with the specificity of epithelial cell apoptosis and crypt drop out. The Special Issue Pharmaceutical and Cellular Strategies to Treat GVHD will present reviews and original papers describing novel drugs and therapeutics up-to-date that hold promise for improved prevention and treatment of GVHD. The suggested papers will discuss different approaches to improve pharmaceutical strategies for prevention and treatment of GVHD (comparing methods of GVHD prevention and lymphodepletion); outline new therapeutic approaches involving innovative agents and hematopoietic stem-cell transplantation (HSCT) for pathogenetic GVHD therapy; compare the effectiveness of chemotherapy and HSCT, including promising technologies that may improve the results of treatment of patients with hematologic malignancies. Keywords: GVHD, Autoimmune Diseases, MSC, HSCT, Oncohematology, Prevention, Treatment, Chemotherapy

About the Journal

Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*.

Pharmaceuticals is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us.

We hope to handle your contribution to *Pharmaceuticals* soon.
