New Trends in the Treatment of Neuropsychiatric Disorders

Message from the Guest Editors

Neuropsychiatric disorders are conditions that involve both neurological and psychiatric symptoms, affecting cognition, emotion, and behavior. Common examples include depression, schizophrenia, bipolar disorder, and Alzheimer's disease, often resulting from complex interactions between genetic, biological, and environmental factors. This Special Issue will explore cutting-edge advances in the treatment of neuropsychiatric disorders, highlighting emerging therapeutic strategies and innovative research. It will cover a broad range of topics, including novel pharmacological agents, neuromodulation techniques (such as transcranial magnetic stimulation and deep brain stimulation), and personalized medicine approaches informed by genetics and biomarkers. This Special Issue will also emphasize the role of digital therapeutics, AI-driven diagnostics, and integrative models that combine psychological, neurobiological, and social perspectives. Together, these contributions reflect a paradigm shift toward more targeted, effective, and individualized care for conditions such as depression, schizophrenia, bipolar disorder, and anxiety.

About the Journal

Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*.

Pharmaceuticals is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us.

We hope to handle your contribution to *Pharmaceuticals* soon.

Editor-in-Chief

Prof. Dr. Amélia Pilar Rauter

Departamento de Química e Bioquímica (DQB) e Centro de Química Estrutural (CQE), Institute of Molecular Sciences, Faculdade de Ciências, Universidade de Lisboa, Lisboa, Portugal

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
