

Special Issue

Recent Advances in Stomach and Intestinal Drug Delivery Systems

Message from the Guest Editor

Every culture around the world has a heritage of traditional remedies to heal their ailments, many of which are oral. Since the dawn of man, treating diseases has been an important task commended to special individuals and deities. Most remedies have been inherited from the experience of early civilizations to our modern-day societies, and now, more than ever, the oral administration of compounds and probiotics for therapeutical purposes is of scientific and technological interest. In this special issue of *Pharmaceuticals* “*Recent Advances in Stomach and Intestinal Drug Delivery Systems*”, the current state of the art is being presented in order and sense for our society. The understanding of the human gastrointestinal tract and its relationship to microbiota populations, as well as the complex and vast port of entry for nutrients and therapeutics it represents, constitutes an always innovative and exciting field, and promises a new to human health.

About the Journal

Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*. *Pharmaceuticals* is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us. We hope to handle your contribution to *Pharmaceuticals* soon.

Editor-in-Chief

Prof. Dr. Amélia Pilar Rauter

Departamento de Química e Bioquímica (DQB) e Centro de Química Estrutural (CQE), Institute of Molecular Sciences, Faculdade de Ciências, Universidade de Lisboa, Lisboa, Portugal

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
