Applications of Beehive Products for Wound Repair and Skin Care

Message from the Guest Editor

The benefits of beehive products for skin care and wound healing have led to a long history of usage in traditional medicine and their recent acknowledgment in modern medicine. Honey, propolis, royal jelly, beeswax, and bee venom are the principal products of beehives that are utilized for various uses. Products made from beehives have several medicinal qualities that make them useful for skin care and wound healing. Their moisturizing, antioxidant, and anti-aging capabilities improve the health and appearance of skin, while their antibacterial, anti-inflammatory, and regenerative qualities aid in the effective healing of wounds. This Special Issue aims to highlight the qualities of these natural ingredients to create medicinal and cosmetic formulations that offer natural and effective remedies for a range of skin and wound-related problems.

About the Journal

Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*. *Pharmaceuticals* is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us. We hope to handle your contribution to *Pharmaceuticals* soon.

Editor-in-Chief

Prof. Dr. Amélia Pilar Rauter
