Special Issue

Neuropharmacology of Plant Extracts and Their Active Compounds

Message from the Guest Editor

Approximately 13% of the world's population, around 970 million people, lives with mental disorders that affect emotional regulation, as well as physical and social functions. The number of cases of anxiety and depression due to the pandemic situation has increased dramatically. A small percentage of people with a mental disorder will look for medical advice. In rural areas, it is difficult to access pharmacological treatments. The use of medicinal plants among the general population for treating mental disorders has increased during the last three years. Many of these plant species and their active compounds remain to be studied. This Special Issue will be focused on medicinal plants used for mental disorders on the following topics: (i) ethnobotanical studies using quantitative tools, (ii) survey-based studies about self-medication/use of herbal products, (iii) preclinical and clinical studies about neuropharmacological action of plant extracts and/or their active compounds, (iv) legislation and regulation of herbal products used for mental disorders, (v) herb-drug combinations, and (vi) herb-drug-based treatments for preventing neurodegenerative diseases.

About the Journal

Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*. *Pharmaceuticals* is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us.

We hope to handle your contribution to *Pharmaceuticals* soon.

Editor-in-Chief

Prof. Dr. Amélia Pilar Rauter

Departamento de Química e Bioquímica (DQB) e Centro de Química Estrutural (CQE), Institute of Molecular Sciences, Faculdade de Cièncias, Universidade de Lisboa, Lisboa, Portugal

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
