Special Issue

Novel Applications of Natural Polysaccharides for Pharmaceuticals

Message from the Guest Editors

Natural polysaccharides are important biomacromolecules that exist in almost all living forms. They have important biological functions, and are receiving increasing attention due to their extensive range of therapeutic and biological activities, including antioxidant, anticoagulant, antidiabetic, anti-tumor, immunomodulatory, antimicrobial, antiviral, and hypoglycemia activities; thus, they are one of the most promising candidates in the biomedical and pharmaceutical fields. Polysaccharides can be isolated from natural sources including algae, plants. microorganisms, and animals. However, there are limitations and challenges to these applications, including batch-to-batch variations, microbial contamination, reduced viscosity during storage, thickening, and uncontrolled rates of hydration. The high variability of polysaccharides in nature adds a new challenge to the extraction and purification of these polysaccharides. Determining and understanding polysaccharides' structural activity relationships could provide new opportunities for their pharmaceutical and biological applications.

About the Journal

Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*. *Pharmaceuticals* is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us.

We hope to handle your contribution to *Pharmaceuticals* soon.

Editor-in-Chief

Prof. Dr. Amélia Pilar Rauter

Departamento de Química e Bioquímica (DQB) e Centro de Química Estrutural (CQE), Institute of Molecular Sciences, Faculdade de Cièncias, Universidade de Lisboa, Lisboa, Portugal

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
