Drug-Induced Neurotoxicity

Message from the Guest Editor

Drug-induced neurotoxicity implies damage or dysfunction in the nervous system caused by certain drugs or chemicals. This neurotoxicity can occur due to direct toxicity to nerve cells, interference with the normal function of neurotransmitters or the disruption of neuronal signaling pathways. The symptoms of these exposures could include mild or severe cognitive impairment, memory loss, behavior, or mood changes. Drug-induced neurotoxicity is a critical issue in pharmacology and neurology. It has been increasingly important due to the increased use of prescription drugs. Searching for pathways and mechanisms that induce neurotoxicity is challenging; however, numerous advances have been made to elucidate such diseases. This Special Issue of *Pharmaceuticals* will provide new insights into the correlations between drugs and neurotoxicity and its related disease, expanding our understanding of how drugs induce adverse effects.

About the Journal

Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*. *Pharmaceuticals* is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us. We hope to handle your contribution to *Pharmaceuticals* soon.

Editor-in-Chief

Prof. Dr. Amélia Pilar Rauter

Departamento de Química e Bioquímica (DQB) e Centro de Química Estrutural (CQE), Institute of Molecular Sciences, Faculdade de Ciências, Universidade de Lisboa, Lisboa, Portugal

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
