Pharmacological Therapeutic Strategies and Drug Delivery for Craniofacial District

Message from the Guest Editor

This thematic issue aims to provide an update regarding new advances and knowledge in drug delivery and pharmacological therapeutic strategies for oral applications, including in vivo and in vitro studies. The topic includes different biomedical sectors and involves pathologies associated with pain and dysfunction in the orofacial district, providing a global overview of oral dentistry from innovative biomedical techniques to the molecular aspects of oral and periodontal disease pathogenesis. Updates in biomedical technologies to improve the prevention and treatment of oral health conditions, focusing on drug delivery and biotechnological applications of active compounds in the cranio-maxillofacial district, are of interest.
