

## Special Issue

# Chemistry-Based Strategies for Drug Delivery and Targeting

### Message from the Guest Editor

A scarce pharmacokinetic profile is often the cause for putting aside compounds that have shown valid pharmacological outlines and a promising therapeutic future. Increasing the dosage of drugs cannot be always the right solution, since it can cause severe side effects and can damage healthy cells and organs. Therefore, in the last few decades, different approaches aiming at modulating the release of drugs and/or targeting them to selective tissues have become an essential partner of the industrial drug development stage. Chemistry-based delivery strategies are potentially able to improve the therapeutic index and safety of active compounds, as well as to give a second chance to 'old' drugs that have lost their clinical interest because of unsatisfactory physico-chemical, pharmacokinetic, or toxicological properties. This Special Issue will be of interest to undergraduate and graduate students, as well as to academy and pharma industry researchers, which are involved in both medicinal chemistry and pharmaceutical technology fields.

## About the Journal

### Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*.

*Pharmaceuticals* is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us.

We hope to handle your contribution to *Pharmaceuticals* soon.

---

### Editor-in-Chief

Prof. Dr. Amélia Pilar Rauter

Departamento de Química e Bioquímica (DQB) e Centro de Química Estrutural (CQE), Institute of Molecular Sciences, Faculdade de Ciências, Universidade de Lisboa, Lisboa, Portugal

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmaceutical Science)
